

A blank coordinate grid. The horizontal axis (x-axis) is labeled with integers from 0 to 40, with major grid lines every 1 unit. The vertical axis (y-axis) has 8 unlabeled rows, with major grid lines every 1 unit. The grid is composed of 41 vertical lines and 9 horizontal lines.

A blank coordinate grid for plotting. The horizontal axis (x-axis) is labeled with integers from 0 to 40. The vertical axis (y-axis) has 8 unlabeled rows, with the bottom row corresponding to y=0. The grid consists of 41 vertical lines and 9 horizontal lines.

A blank coordinate grid for plotting. The horizontal axis (x-axis) is labeled with integers from 0 to 40. The vertical axis (y-axis) has 8 unlabeled rows, represented by horizontal grid lines. The grid is composed of 41 vertical lines and 9 horizontal lines, creating a 40x8 grid of squares.
